

**Safety/Security Alert #2006-01**

(issued 12/04/2006)

**LIVESTOCK ON ROADWAY**

BSL motorists are advised to be especially vigilant while driving the stretch of Burnt Store Road between the Tern Bay development and our community. Apparently there is still a number of livestock roaming the scrub brush in that area. While the area is "fenced," occasionally a determined animal is able to evade the barrier. The outcome of such an episode could be tragic, not only for the animal - as it was this past weekend - but for any motorist who happens to collide with them. Until we can determine who owns these animals and what steps can be taken to strengthen the barrier, please stay alert while driving this stretch of road - especially at night.
