

Safety/Security Alert #2007-01c

(issued 04/24/2007)

ELECTRIC JUNCTION BOX (HAND-HOLE) MALFUNCTION – UPDATE #3

This message is a 3rd update to Advisory #2007-01, concerning the electric service malfunction of a junction box, or "hand-hole," in Burnt Store Lakes.

The BSLPOA has been informed by FPL that their subcontractor, Pike Electric, began hand-hole inspections today (04/24/07). These inspections will begin early each morning and continue until all hand-holes in our community have been checked, serviced, and repaired, if necessary.

FPL has asked the POA to inform homeowners that, **“brief power interruptions may be necessary as early as 8:00AM to perform the required checks and maintenance.”**

FPL has also advised that each hand-hole cover will be sprayed with a small blue circle when the inspection has been completed.

Please contact the POA Office at 639-5881 if there are any questions.
