Community Notification #2007 - 02
(Issued 06/11/2007)

UPDATE: LAKE LITTORAL PLANTING

The Lakes Committee, in conjunction with Aquatic Systems, is currently watching the water levels on all of the lakes to determine the optimum time for our littoral plantings. You will be notified when this is to take place on this Communication Network so that you may place your orange flags in your yard to mark the borders for your plants. Remember, it must be in twenty (20) foot segments. In addition, once the plants are placed, Aquatic Systems will be monitoring them on a weekly basis and performing maintenance on a monthly basis.

Many of you will notice that lake water levels have risen—specifically Pelican Lake and Osprey Lake due to the inflow of Charlotte Harbor water by strong southwest winds. We are waiting until water rises to normal levels as a result of rainfall.
